

If you needed secure site perimeter access control here tomorrow

you'd call: 0203 859 9588

At Fortis Property Services, we supply and install access control pods with facial recognition to lock down site entry and give you certainty over who is on site, when they arrived, and when they left. It's ideal for construction environments, but just as effective for controlling vacant sites where access must be managed tightly. Weekly rental keeps it commercially sensible, without a large upfront commitment.

This is about control and evidence. You get daily attendee records, time and attendance visibility, and the ability to pull retrospective logs when incidents, disputes, or compliance checks arise. It reduces tailgating, stops unauthorised access, and gives your management team a clean, defensible audit trail. Simply **contact us** today to request a quotation.

Access Site Control

Technical overview

A managed access solution using facial recognition pods to control entry and produce time-stamped attendance records.

What we install

- Access pod unit(s) at entry point(s)
- Camera and facial recognition module
- Turnstile or controlled access interface (where specified)
- Power and connectivity solution (site-dependent)
- Optional signage and lighting

What you get

- Daily attendance logs and time records
- Entry and exit tracking (where configured)
- Retrospective reporting for incidents, investigations, audits
- Weekly rental model with service support

Process

- Site survey and entry-point assessment
- Install and commissioning
- Enrolment method agreed (onboarding)
- Weekly checks / support visits (as contracted)
- Reporting cadence agreed with client

Typical use cases

- Construction access control and workforce tracking
- Vacant site controlled entry for contractors
- Live sites requiring proof of attendance

Health & safety controls

- RAMS provided for installation and maintenance
- Cable routing and trip hazard control
- Safe working zones during installation

Reporting

- Daily log export (CSV/PDF options)
- Incident report support on request
