

If you needed managed access control system doors here tomorrow

you'd call: 0203 859 9588

At Fortis Property Services, we supply and install door access control systems that replace keys with managed permissions. It's the simplest way to stop unauthorised access, reduce key-related risk, and control who can enter specific areas across blocks, offices, mixed-use sites and managed properties. Delivered by specialist teams operating under the Fortis brand, our systems are set up around real building use, not generic assumptions. Clear permissions, simple oversight and control when access needs change.

This gives you visibility and governance. Audit trails, controlled access levels, time rules, and quick permission changes reduce exposure and remove the operational chaos of lost keys, copied fobs and unclear accountability. Where required, we integrate with CCTV, alarms and fire systems for a clean operational handover and a stronger compliance position. Simply **contact us** today to request a quotation.

Access Control - Door Entry Systems

Technical overview

Door entry control with credential management, audit trail and permission rules.

Hardware options

- Magnetic locks / electric strikes
- Proximity readers / keypad / mobile credentials
- Fire-rated door interface options (where required)
- Door closers and monitored contact sets
- Request-to-exit buttons and emergency break glass

What you get

- Controlled access by area, role, time
- Audit trail of access events
- Reduced key management risk
- Fast revoke/issue permissions without lock changes

Process

1. Door schedule review and survey
2. System design and access levels set
3. Installation and commissioning
4. User enrolment and admin handover
5. Support and maintenance option

Operational add-ons

- Visitor credentials
- Remote management (site dependent)
- Integration with CCTV/alarm systems

H&S controls

- Fire door integrity respected
- Safe isolation during electrical works
- RAMS provided
